Holes of various sizes and at different heights had been drilled into a piece of drift wood which served as the container for the foliage used. This was then attached to the hardware cloth. There were at least eight different tiny plants or foliage of plants nestled in the holes into which wet peat moss had been inserted. An arrangement of this will last from one to two months if moistened with water occasionally.

Several other attractive arrangements and potted plants were presented at the meeting. The members voted on and discussed the entries. Each month this will be done in order to stimulate interest and also to learn from the more experienced members.

HOME AGENT'S NOTES

By GLORIA CLAY
Home Demonstration Agent
Hancock County

Are any of the members of your family from 16 to 20 years old?

If you answer "yes," you may have one reason for a higher grocery bill than your neighbor with younger children.

Food economists of the U. S. Department of Agriculture estimate that it costs \$4.50 a week to feed a 3-year-old boy compared to \$11.50 for a 16-year-old boy and \$8.50 for a 75-year old man. These figures are based on a moderate cost food plan and food prices in August, 1958. They are for home meals, not "eating out."

The cost of feeding children at any age under 12 years is the same for boys or girls.

When they are over 12 years old, boys and men need more food than girls and women of the same age. It costs about a third more to feed a 16-year-old boy, on the average, than to feed a girl of the same age. Next to the teen-age boy, a man of 35 to 54 years averages highest in the cost of his food.

As a general rule, the food economists say foods costs increase with age up to 20 years old, then decrease.

So as you plan your food budget, consider the ages of the people in the family, as well as the number.

GET MORE LIGHT FROM YOUR LAMPS

Here're five ways to help you get more light from your lamps.

1. Check the bulbs. Have bulb snatchers been at work and left some of the sockets empty? Be sure you have at least 150 watts in each reading lamp. "Use White" bulbs for eye work; try tinted bulbs for decorative effect only.

2. Have your lamps in the right place. A lamp two feet away gives you only a fourth as much light as a lamp one foot away. Proper placement gives best spread of light plus visual comfort for the user and saves in the room.

3. Check the shades. Are they white? Inside? Are they right size, shape, height, and texture to keep light out of your eyes and yet where you want it? Shades provide light control as well as beauty.

4. Keep the bulbs and lamps clean. Just a little dust can steal a lot of light from your lamps. To get the full light output that bulbs are rated for, include lamp shades, snatches and bulbs in regular cleaning.

5. Replace old or worn-out bulbs. New bulbs are cheap and many places will let you return old bulbs for credit to help pay for the new ones.

February 2nd Marks 58th Anniversary Of The Army Nurse Corps

February second marks the 58th anniversary of the Army Nurse Corps whose members are serving everywhere American Troops are stationed.

Founded in 1901 to insure adequate military medical care, the Corps has established an enviable record of distinguished service during three armed conflicts. In peacetime, as well, the Corps has been a leading force in the movement to improve the nursing care of all patients, civilian and military.

Although Army Nurses now serve as commissioned officers in grades from second lieutenant to colonel, they once were paid only \$2 a month plus room and board. That was long ago in Revolutionary days when George Washington first obtained federal pay for nurses.

The 19th Century saw American nurses responding to the war needs of both Confederate and Union troops and to the Spanish-American War call for professional people to alleviate suffering.

The two World Wars and the Korean Conflict were further opportunities for women to provide vital nursing services to our troops around the world. In Europe and Asia, Army nurses distinguished their corps with a tradition of highly honorable service.

And still there is an important place of duty for nurses in the Army. Nurses are attached to American units throughout Europe and Asia and serve with Military Advisory Assistance Groups in Turkey, Iran, Viet Nam and Taiwan.

At the prequest of the ANC, Miss Mary M. Roberts, a notable figure in nursing, prepared a study of the historical development of the Corps and analyzed the opportunities it offers graduate and student nurses. She commented, in part: "The incentives of promotion in grade, the dynamic leadership, the extraordinary variety and richness of clinical

experience, the provisions for specialization and educational advancement, the opportunities for service in other countries and for incidental travel and the economic security provided by the ANC make military nursing an unusually attractive career. Oldest of the Federal nursing services, the ANC has served the Nation with devotion—on the basis of its honorable past and its dynamic present the Army Nurse Corps offers a rewarding career to professionally qualified nurses." SOIL CONSERVATION

HUGH SANFORD

The Soil Conservation Service has assisted the S. C. D. in planning two new farms this month. They are Mr. James Marting Flat Top Community, and Mr. Charles B. Page, Salem Community. This adds 50 acres to the 51,724 acres, making a total of 51,774 acres of land in the county cooperating with the Soil Conservation District.

The Soil Conservation Service furnishes technical assistance to cooperators also in surveying pond dams, terraces, waterways, tung contours, ditches and various other survey work needed on the farm for control of soil and water.

The S. C. S. also assists in planning pastures, where to locate, how to seed, fertilize and prepare land.

The S. C. S. furnishes all the tools of its own technicians at no cost to the farmer. The S. C. S. does not however, share the cost in putting in the different practices on the farm. The cost share may be inquired about in the County A. S. C. office.

If you have a soil, or water problem on your farm, or if you want to plan it, for soil and water conservation, contact your local Soil Conservation Service office, on Necaise Avenue, Bay St. Louis.

The Restless Years

Play at Star Theatre Sunday and Monday

Pulsating across the screen the tempo of today's America Universal International's dramatic story of adolescent unrest small town gossip, "The Restless Years," plays Sunday and Monday at the Star Theatre.

The new picture, which is produced by Ross Hunter, directed by the noted German film director, Helmut Kautsky, is the right-out of the box of today's newspaper story teenage couple seeking recognition and acceptance as equals in the modern world.

In her first screen role, completed well before her sixteenth birthday, Sandra Dee, demonstrates a vivid graphic dramatic sense, portraying with intense feeling the role of a young high school student claiming her right to happiness despite social unearns against which she has no defense as an illegitimate child. And John Saxon, one of the most popular and talented of Hollywood's young luminaries, gains even greater acting status with his compelling, sensitively etched portrayal of a boy who becomes a man as he too, fights against malicious character assassins.

Adding to the lustre of the film are the shining performances of a star-studded cast which includes the former Academy Award winning actress, Teresa Wright, James Whitmore, Lillian Patten, Margaret Lindsay and Virginia Grey. Jody McCrea and Alan Baxter add to the impact of the picture with outstanding characterizations.
